

BIOFORUM X- Leipzig, 14-15th June 2004

Workshop content

This workshop was intended as a writing workshop for the “Spatial Planning” and “Conflict Management” working groups, in order to work effectively towards the completion of the final project report, due in December 2004. A total of fourteen participants, all familiar with the projects and its aims, attended the meeting.

The meeting started on the first day with a plenary meeting during which the project coordinator (Allan Watt) and working group leaders (Scott Jones and Peter Nowicki) gave a brief overview of the project and working group progress. The rest of the workshop was dedicated to writing, with plenary sessions at the end of each day to discuss work progress, issues that had arisen during group discussions and steps forward.

The two working groups are expecting to produce initial drafts by the end of July 2004. This will be followed by a period of editing, and a call for further comments from all BioForum participants. The report should be ready for the next BioForum meeting in October 2004, where it will benefit from ACC input.
